Presentation

As Chair of the Local Organizing Committee of the **9th International Congress of Andrology**, that will take place 7-10 March 2009 in Barcelona, Spain, I am pleased to contact you again.

The Program Organizing Committee, chaired by Professor Christina Wang, has been working together with the Local Organizing Committee to prepare a cutting edge program which covers many exciting and new developments in the field of reproductive biology and medicine, with a focus on andrology. For this we have invited many outstanding scientists, investigators and clinicians in andrology and related fields to present their work and thoughts at the Congress.

It is with great pleasure that we present the 3rd announcement of the scientific program. For additional information and the latest news about the program, you can visit the official website of the congress: www.ica2009.com.

Please, note that November 10th 2008 is the abstract submission deadline.

I hope to see all of you in Barcelona!

Dr. José L. Ballejà

Barcelona

Located in a privileged position on the northeastern coast of the Iberian Peninsula and the shores of the Mediterranean, Barcelona is the second largest city in Spain in both size and population. It is also the capital of Catalonia, 1 of the 17 Autonomous Communities that make up Spain.

There are two official languages spoken in Barcelona: Catalan, generally spoken in all of Catalonia, and Castilian Spanish. The city of Barcelona has a population of 1,510,000, but this number spirals to more than 4,000,000 if the outlying areas are also included.

The capital of Catalonia is unequivocally a Mediterranean city, not only because of its geographic location but also and above all because of its history, tradition and cultural influences. Barcelona, more than just a single city, is really a collection of multi-faceted and diverse cities offering the best of European culture throughout the ages in one location. Neatly matching the ancient with the ultra modern, Barcelona truly stands out as the jewel of the Mediterranean.
